## **GLUEFAST INTRODUCES MASTER PURGE**

### **A superior hot melt purging compound**

Gluefast introduces a new solvent-free 100% solid mixture that is an excellent purging compound to be used for cleaning hot melt equipment. It is great for circulating or non-circulating units.

As hot melt ages in a glue pot the adhesive will oxidize and char. Hot melt equipment manufacturers generally recommend periodic cleaning of the hot melt equipment. The unique molecular structure and chemistry of Master Purge helps to loosen and release the charred hot melt adhesive quickly and cleanly.

The Gluefast Company has manufactured gluing equipment and adhesives for the packaging, converting, and graphics industries for more than 65 years! Gluefast can be found on the web at [www.gluefast.com](http://www.gluefast.com).

For further information please contact Lester Mallet by phone or e-mail: [lmallet@gluefast.com](mailto:lmallet@gluefast.com).
